

Company

With WiMedical you get a reliable national and international partner for the development, production and distribution of innovative medical washing and sterilization trays. Medical technology companies, hospitals, clinics, medical practices and sterilization companies benefit from our customized, cost-saving and flexible sterilization trays. In addition to your sterilization trays, we can also develop your medical instruments as contract manufacturer on request.

Our company is located in Singen, Germany. We are therefore close to the „World Center of Medical Technology Tuttlingen“ and can build on a strong network of partners and suppliers. In order to offer our customers high quality and delivery reliability, we develop and manufacture our products „Made in Germany“.

With our self-developed, award-winning and patented MUNDITIA SYSTEM CASE we protect and organize sensitive surgical instruments and medical devices during cleaning, sterilization, transport and storage.

Innovative cleaning systems
for medical devices.

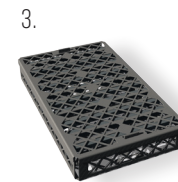

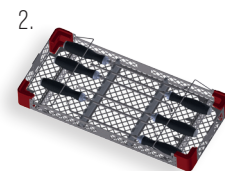

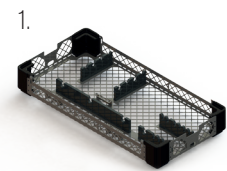

Medical Technology Manufacturer

WiMedical offers medical technology manufacturers fast and flexible solutions for the development and production of instrument containers, sterilization and washing trays, workpiece carriers and medical instruments. Our development department is equipped with modern 3D construction programs and will design your future products together with you. We are your partner in consulting, design and development from prototyping up to serial production.

Services

1. Munditia System Case Custom Made
2. Development and Prototyping
3. Workpiece Carriers and Magazines
4. Medical Instruments
5. Sheet Metal and Pipe Processing
6. Hygiene Products

Your Added Value

Improves Quality

As the rinsing shadows are reduced to a minimum (to approx. 1 mm per contact point).

Saves Costs

By protecting your sensitive and expensive medical instruments with secure fixation. You also save running costs for the purchase of additional plastic holders in the tray.

Environmental Protection

The Munditia Case Flex Smart, Standard and Special are completely without plastic and also improves the fixation of the instruments.

Process Improvement

During the cleaning process by easy and flexible loading and fixing of your medical devices.

Healthcare Facilities

From the idea - to perfection. Innovative. Efficient. Sustainable.

Our customers are our most valuable asset. That is why we maintain a close and cooperative partnership with our customers. We focus on the end users in the sterilization departments of hospitals, medical practices and sterilization facilities.

Only through regular surveys and customer feedback we have been able to develop our sustainable systems.
